GOVERNMENT OF INDIA
MINISTRY OF NEW AND RENEWABLE ENERGY

6th October 2015

TO WHOMSOEVER IT MAY CONCERN

Climate Policy Initiative (CPI) is a well-known non-profit, analytical group with offices in New Delhi, Jakarta, London, Rio de Janeiro, San Francisco and Venice working in the realms of climate and energy policies with a particular focus on finance.

CPI has successfully implemented the Global Innovation Lab for Climate Finance in partnership with the support of the governments of US, UK, Germany, France, Denmark, Netherlands, Norway and Japan in 2014. This lab is currently piloting four financial instruments out of close to hundred promising ideas.

Based on the above successful experience, CPI is planning to establish "Innovation Lab for Green Infrastructure Finance for India" ("the India Lab"). The activities of the proposed lab have been already briefed by Prof. Tom Heller, Executive Director and Dr. Gireesh Shrimali, Director of Climate Policy Initiative to the Ministry. The India Lab will bring together public and private players on a common platform with the objective of unlocking and channelizing private investment for green infrastructure sectors such as renewable energy and energy efficiency.

We look forward to being engaged in the India Lab as a key stakeholder without any financial implication and will continue to provide all required supports and cooperation.

The Ministry wishes the CPI team a great success in this initiative.
